Education

Rutgers University - New Brunswick

Graduation Date: Jan 2026

BA Computer Science and BA Data Science, Double Major

Relevant Coursework: Deep Learning, Applied Statistical Learning, Regression Methods, Data Science, Linear Algebra, Statistics, Computer Architecture, Algorithm Analysis and Design, Systems Programming, Bayesian Data Analysis

Leadership: Rutgers Destiny Treasurer 2023-2024, and Rutgers Destiny President 2024-2025

Work Experience

CareMagix | *Software Engineer* | Remote

Jun 2025 - Aug 2025

- Led team of 4 developers, driving delivery of website features and defect resolution.
- Built vector embedded lancedb database of 70K+ diagnostic (ICD) codes, queried to map sentences to relevant codes.
- Programmed custom Python class to access and query database, tested and deployed tool in production.

UBS | *Data Engineering Intern* | Weehawken, NJ

Jun 2024 - Aug 2024

- Used Databricks to create data pipelines; ingested and transformed data using Python and SQL to create clean tables.
- Automated secret rotation of application accounts, and integrating rotation with Azure pipelines for 100+ developers.
- Designed and demoed a SharePoint site that sent forms to shared Excel Sheet using Power Automate Flow.
- Composed solution to help employees find team members with similarity search; presented product to 30+ stakeholders.
- Fixed job dependency issue caused by incorrect synchronization configuration, potentially reducing delays by 50%.

Compunnel | *Data Analysis Intern* | Plainsboro, NJ

Jun 2023 - Aug 2023

- Leveraged machine learning algorithms to create a Customer Lifetime Value prediction model.
- Analyzed over 500,000 rows of data to calculate RFM scores and segment customers and created PowerBI reports.

Commvault | *Software Engineering Intern* | Tinton Falls, NJ

May 2022 - Aug 2022

- Managed Virtual Machines, and used Python/PowerShell to run software/OS updates and automate 50+ machine snapshots.
- Developed a database table accessed by Python backend and report/workflow to manage 100+ VM allocations.

Projects

Rank Visualization ETL Pipeline | *Python, Snowflake, SQL, APIs, Streamlit*

Mar 2026 - Mar 2026

- Built an end-to-end player analytics platform, extracting data from Riot Games API to show custom graphs.
- Automated API ingestion with stored procedures and Snowflake Tasks that would automatically fetch and clean data.
- Developed a Streamlit in Snowflake dashboard with Altair visualizations to allow end user to fully customize insights.

Esports Game Prediction Model | *Python, SQL, Pandas*

Nov 2024 - Dec 2024

- Cleaned and analyzed 100,000+ rows of League of Legends esports data to build a model predicting game outcomes from the first 15 minutes.

Street Fighter AI | *Python, OpenAI Gym*

Oct 2024 - Nov 2024

- Trained a model to play Street Fighter 2 using Gym; utilized PPO and wrote a custom reward function.

CNN Geoguessr | *Python, Google Maps API*

April 2025 - May 2025

- Trained Convolutional Neural Network on Street View images to predict photo's country; demoed to 50+ people.

Shockwave | *Python, SQL, discord.py, Pillow* | shockwave.netlify.app

Jun 2022 - Present

- Built a Discord bot for gaming communities with random/draft/elo-balanced team formation and tournament brackets.
- Designed a gold-based betting economy and a 17-achievement trading-card cosmetic system rendered using Pillow.
- Maintained reliability with a 650+ unit test suite covering game state, brackets, and economy transactions.

Certifications

Advanced Data Engineering with Snowflake | *Snowflake* | XX9MCCAX21FW

Feb 2026

Advanced Data Management in Azure Databricks | *Packt* | SE5LLCBILCSS

May 2026

Technical Skills

Languages: Python, SQL, C, Java, R

Developer Tools: Git, gdb, VS Code, Unix, MongoDB, HTML, Snowflake, DataBricks, Azure, PowerBI, MATLAB, React

Technologies/Frameworks: OpenCV, MongoDB, Docker, SharePoint, Pandas, Mediapipe, PyTorch, Tensorflow, LanceDB

Concepts: Machine Learning, CI/CD and ETL Pipelines, Reinforcement Learning, Object Oriented Programming, AI/LLMs

Interests: Music/Music Production, Fishing, Reading, Gaming
